Saudi Arabian Chevron (SAC) works in partnership with Kuwait Gulf Oil Company (KGOC), through joint operations (JO) located in Al-Wafra area in Kuwait. JO operates three fields: Wafra, South Umm Gudair and South Fuwaris. A sole Main Gathering Center is located at Wafra with many subcenters throughout the three main fields.

PROJECT GOAL AND SCOPE

- Evaluation of the status and appropriate coverage of existing fire protection systems, and operational response.
- Field Investigations & Studies and Field Investigation Report.
- Recommendations for Enhancements and Overall Preliminary Report.
- Tender package(s) development for implementing approved recommendation by installation contractors.
- Budget cost estimate.

BUSINESS NEEDS

- Identification of risk and application of risk reduction measure.
- Compliance with international fire safety standards and industry practice.
- Enhanced emergency response personnel and equipment capabilities to meet current risk.

BUSINESS BENEFITS

- Analysis and Evaluation of fire risks and the required level of protection for critical facilities.
- Enhancement of Emergency response capabilities enabling better preparation to attend to any fire incident.
- Reduction of operational risks.
